World Service:

We are writing to express our feelings on the recent group questionnaire. Basically, we were dissatisfied and would like to explain why. Our main concern was that it was vague. Many questions we could not answer as a group. For example, #1, #14, and #22 could only be answered by a small % of members with service experience. Most members don't know. Also, on question #14, how would we as a group know if many of these committees efforts are valuable? Perhaps our GSR or more likely ASR would have a better idea. On #7 & #8, who do you mean by fellowship? If you mean the group, no, if you mean all regions, yes. Or more specifically, perhaps ask whom ever the project will effect.

Please note, our group shows up each week to talk about recovery from the disease of addiction and not World Services. At least half the members (10-12) don't do any service above the group level and barely know World Services exists let alone it's function. Nor do we need to know to stay clean, and that is our purpose.

I must add that our group does not want the responsibility for deciding on many World level issues. We don't have sufficient information to answer 70% of the Conference Agenda Report. That is why we elect trusted servants and trust a higher power.

That is all, I hope I have explained why we didn't feel many questions were best suited to be aimed at groups. Thank you for reading.

In loving service,

Lynda G.
